# Heavily CENSORED Pfizer documents show that COVID began a five-year mass DEPOPULATION agenda that will reach completion by 2025

12/28/2023 // Ethan Huff // **3.5K** Views

A startling prediction about what will soon come upon the world in the form of *genocide* is **backed by** the infamous Pfizer documents, which outline the five-year plan starting in 2020 to massively depopulate the world by the year 2025.

In the confidential documents that Pfizer submitted to the U.S. Food and Drug Administration (FDA), the forecast by Deagel, a global intelligence and consulting firm, is mentioned. It points to 2025 as *the year* when mass genocide from Wuhan coronavirus (COVID-19) "vaccination" becomes apparent.

A minor branch of U.S. military intelligence, the Deagel corporation is somewhat secretive in that it operates behind the veil to collect data and other intelligence for high-level decision-making purposes throughout the military-industrial complex.

Deagel works with names like the National Security Agency (NSA), the United Nations (UN), and the World Bank. It also contributed to the Stratfor report on North Korea.

Because of this, Deagel would seem to hold legitimacy as a player in the intelligence community. It appears unlikely, in other words, that Deagel is a disinformation asset spreading fear without basis.

"This means its population predictions for 2025, as well as its industrial output predictions on a nation-by-nation basis, are not mere fantasy but instead based on strategic assumptions which are shared and well understood by other players in the intelligence community," reports *The Exposé*.

(Related: Did you know that the CIA is behind Deagel's [shocking 2025 depopulation forecast](#), which is more of a *target* rather than an estimation or prediction.)

## How did the world get here?

Sometime in 2020, Deagel removed the 2025 forecast from its website. The Wayback Machine and Internet Archive [still show it](#), though.

You will notice from the archived report that Deagel expects the population of the United Kingdom (UK) to drop by 77.1 percent come 2025. That is *a lot* of people who are expected to die in just two short years. As for the United States, Deagel expects population numbers to drop by 68.5 percent by 2025.

As for Germany, its population is expected to decrease by 65.1 percent by the end of 2025, along with a 34.6 percent population decline expected in Australia by the year 2025. There is a [complete list](#) of all the population declines predicted for 2025 all around the world.

"Sadly, the confidential Pfizer documents coupled with staggering deaths among children suggest Deagel's depopulation figures were not just an estimation, but a target," reports *The Exposé*.

This is more than likely one of the reasons why the FDA, operating on behalf of Pfizer against the interests of the American taxpayers who fund its existence, plotted to delay the release of the Pfizer documents for a full 75 years – because by then, nobody still alive at that time would even remember COVID, let alone the 2025 genocide event that is shaping up to follow.

The Pfizer documents have since been on a delayed-release schedule, thanks to a January 2022 order from federal Judge Mark Pittman, whom at that time ordered the FDA to release 55,000 pages of the documents per month.

As of now, all of the documents are available at [the PHMPT website](#).

"I can only wonder why we tolerate our political systems being hijacked and steered by those with the most wealth?" wrote one concerned commenter about how the world got to this point in time.

"It's so obvious where this came from, both the originating confused and psychotically neurotic minds and the organization which made it all possible. But it's not only that insanity to blame. It's every one of us. Every one of us who sees such a system of absolute disorder and conforms our lives to its system of 'order.'"

The COVID depopulation agenda is now well underway. Learn more at [Genocide.news](#).
